We're going to the Agile for Embedded Conference! Come and join us!

March 18th

Venue: Greenpark Conference Centre, Green Park, 100 Longwater Avenue, Reading, RG2 6GP

Using a mix of keynote sessions and user case studies, the day will provide a forum to review modern Agile practices, share experiences of using Agile for embedded developments, and stimulate discussion around Agile development and the specific challenges of embedded systems.

Event Website

Lunch and Learn Session - 12:40pm

QA Systems will be presenting a talk on 'Automated Testing in a DevOps CI Pipeline', during the lunch break. Come and chat to our unit and integration testing experts to learn more about our solutions.

What's Our Talk About?

Learn how configuring tests in a continuous integration

automating compliance with architectural design, software metrics and coding standards pre-test. Overviewing automation of pipeline Steps within Stages, the scripting options, triggers and quality gates for fully automated testing and reporting.

Understand the agile benefits of software analysis and test infrastructure as code for automated testing in a DevOps pipeline.

Presented by:

Matt Davis, Managing Director of QA Systems Ltd.
